## **DETAILED ACTION**

### ***Status of Claims***

Claims 1-22 are cancelled and Claims 23-44 are new.

### ***Drawings***

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1793

Claims 28, 41 and 42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 28, the phrase "preferably" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention.

Claim 41 recites the limitation "the treatment" in line 1. There is insufficient antecedent basis for this limitation in the claim. Applicant provides basis for treatment substances for degassing only in Claim 37.

#### ***Allowable Subject Matter***

Claims 23-27, 29-40, 43 and 44 are allowed.

Claims 28, 41 and 42 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Bilodeau et al (US 6,960,239 teaches a rotor arrangement as shown in FIGs 4-8. A solids/gas mixture passes down the hollow core 27 of shaft 15. A second annular plate 25 is mounted beneath lower blades 25, creating a segment shaped passageway (column 4, lines 20-37). The molten metal is drawn upwardly through axial hole 26 where it engages the solids/gas mixture. The mixture is dispersed outwardly through cavities 28 (clines 46-51). However, Bilodeau et al does not teach a second outlet as claimed.

Art Unit: 1793

Duenkelmann (US 4,908,060) teaches a rotary device for dispensing gas in molten metal comprising a hollow shaft and a hollow rotor. The rotor has a plurality of vanes dividing the rotor into different compartments, each compartment having an inlet and an outlet (abstract). However, Duenkelmann does not teach a second outlet in each compartment as claimed.
